Databases - DML Statements and SQL Server Administration - Revised

This course begins by discussing how the SELECT statement retrieves data from your database. You will learn that the SELECT statement can include the WHERE clause to define the conditions used to determine what rows will be returned. This course will also teach you how to modify your database using INSERT, UPDATE and DELETE.

Modules Studied

Module 1: Using DML Statements

Module 2: Sql Server Administration Fundamentals

Module 3: Course assessment
